

CAMPUS RESOURCES AND SERVICES

Each student is a person of dignity, worth and responsibility who has elected to attend the university for the purposes of attaining an education and to grow and mature through additional learning experiences outside of the classroom.

The goal of Academic and Student Affairs is to assist in the total development of each student by providing appropriate, life-centered educational programs and services. Primary concerns of the various departments focus on helping students to develop leadership skills, decision-making competencies, self-discipline, respect for others, skills of self-evaluation, and the learning and development of social responsibility and human relations skills.
