

PHYSICIAN ASSISTANT STUDIES (PHYA)

PHYA 590 - Experimental

A unique and specifically focused course within the general purview of a department which intends to offer it on a "one time only" basis and not as a permanent part of the department's curriculum.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 595 - Workshop

A workshop is a program which is usually of short duration, narrow in scope, often non-traditional in content and format, and on a timely topic.

Credits: 1-6

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 598 - Selected Topics

A Selected Topics course is a normal, departmental offering which is directly related to the discipline, but because of its specialized nature, may not be able to be offered on a yearly basis by the department.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 601 - The Physician Assistant Profession

This course provides an historical perspective of the Physician Assistant profession, as well as an investigation of current trends and issues. The course stresses the professional responsibilities in relation to the Physician Assistant's role as a health care provider. Content relating to medical ethics and the NCCPA code of ethics, Physician Assistant professional organizations, professionalism, the medical team, program accreditation, graduate certification and re-certification, employment considerations and professional liability are included. This course will also include Health Insurance Portability and Accountability Act (HIPAA) competency acquisition.

Credits: 1

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 603 - Clinical Skills Lab I

In this course, students will employ the knowledge, technical skills and procedures based on current professional practice to be successful practicing physician assistants. In this course, students employ knowledge, skills, and techniques needed to perform clinical skills needed to evaluate surgical and ambulatory patients. Students learn to perform procedures throughout this course including: Sterile technique, injections and immunizations, treatment of abscesses, removal of foreign bodies, and clinical procedure involved with the dermatological, otolaryngology, male genitourinary, obstetric & gynecological, urinary, and neurological systems. Clinical procedure involving treatment of the abdomen will also be covered.

Credits: 1

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 604 - Emergency Medicine

In this course, students learn treatments of trauma and medical disorders that commonly present to the emergency department. The emphasis is on the priority of stabilizing patients with life-threatening trauma or illness and selecting appropriate diagnostic and therapeutic measures.

Credits: 2

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 607 - Clinical Skills Lab II

This course is a continuation of Clinical Skills Lab I. In this course, students employ knowledge, skills, and techniques needed to perform clinical skills needed to evaluate surgical and ambulatory patients. This course will focus on learning clinical procedures involve with the: cardiovascular system, phlebotomy, pulmonary system, musculoskeletal system, wound management and closure, and skills involved with the operating room.

Credits: 1

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 612 - Clinical Anatomy and Physiology with Lab I

This course provides students with a working knowledge of the major anatomical regions and structures of the body in relation to the: otolaryngology, ophthalmology, integumentary, and musculoskeletal body systems. Lecture will focus on histology, physiology, and cell biology of the stated body systems, while the laboratory component of the course will focus on the gross anatomy of the body systems through examination of the cadaver. Clinical correlations to common pathologies will also be discussed for each body system.

Credits: 3

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 616 - Clinical Pharmacology and Pharmacotherapeutics I

In this course, students are introduced to pharmacodynamics, pharmacokinetic and Pharmacotherapeutics principles that provide a foundation for the study of pharmacology and pharmacotherapeutics. Students will also learn how to write prescriptions. Combined lecture and active learning exercises help students to demonstrate skills that a Physician Assistant needs to enhance patient care in clinical practice. This course focuses on pharmacology and therapeutics related to otolaryngological, ophthalmological, integumentary and musculoskeletal diseases and disorders.

Credits: 2

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 621 - Geriatrics

This course will focus on the geriatric population from age 65 to death, surveying disorders common to the geriatric population. Fundamental elements of clinical medicine as the elements relate to health maintenance and wellness of this patient population will be covered as appropriately indicated. Physician Assistant students will have a greater appreciation for and comprehension of the socio-behavioral aspects of medical practice. Wellness and preventative medicine will be discussed. Students learn effective counseling and preventive education strategies for enhancing treatment compliance, promoting positive health patterns wellness and enhancing positive responses to illnesses in this patient population. Special topics include death and dying, giving bad news, hospice care, palliative care and facilitating end-of-life care.

Credits: 1

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 622 - Clinical Anatomy & Physiology with Lab II

This course provides students with a working knowledge of the major anatomical regions and structures of the body, focusing on the endocrine, gastrointestinal, obstetrics/gynecology, genitourinary, and renal systems. Lectures will address the normal physiology, cellular biology, and molecular and genetic components of these organ systems, as well as the pathophysiologic changes associated with various diseases. The laboratory component will emphasize the gross anatomy of these systems through study of the cadaver. Diagnostic tests used to evaluate and diagnose disease in the respective body systems will also be discussed.

Credits: 3

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 626 - Clinical Pharmacology and Pharmacotherapeutics II

This course provides an in-depth study of the principles and application of pharmacology and pharmacotherapeutics in clinical settings. Students will develop a comprehensive understanding of how drugs interact with the human body, including their therapeutic effects, adverse reactions, and mechanisms of action. This course builds upon the knowledge gained in Clinical Pharmacology and Pharmacotherapeutics I. It emphasizes the practical application of pharmacological principles in patient care, with a focus on the selection, dosing, and monitoring of medications to achieve optimal therapeutic outcomes in the endocrine, gastrointestinal, genitourinary, obstetrics/gynecology, and renal systems.

Credits: 3

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 630 - Pediatrics

This course will focus on the pediatric population from birth through adolescence, surveying disorders common to the pediatric population. Fundamental elements of clinical medicine as the elements relate to health maintenance and wellness from birth through adolescence are covered as appropriately indicated. Normal growth and development are reviewed, together with suggestions for effective parent-child communication and interaction. Students learn effective counseling and preventive education strategies for enhancing treatment compliance, promoting positive health patterns and enhancing positive responses to illnesses in this patient population.

Credits: 1

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 632 - Clinical Anatomy & Physiology with Lab III

This course provides students with a working knowledge of the major anatomical regions and structures of the body in relation to the: cardiovascular and respiratory systems, additionally genetic anomalies and infectious disease will be covered in this course. Lecture will focus on histology, physiology, and cell biology of the stated body systems, while the laboratory component of the course will focus on the gross anatomy of the body systems through examination of the cadaver. Clinical correlations to common pathologies will also be discussed for each body system.

Credits: 3

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 636 - Clinical Pharmacology and Pharmacotherapeutics III

In this course, students will solidify and understanding of pharmacology and pharmacotherapeutics principles learned in Clinical Pharmacology and Pharmacotherapeutics I and II. Students will become proficient at writing prescriptions. Combined lecture and active learning exercises will continue to help students demonstrate skills that a Physician Assistant needs to enhance patient care in clinical practice. This course focuses on pharmacology and pharmacotherapeutics related to hematological, cardiovascular and pulmonary diseases and disorders. Pharmacological treatments related to infectious disease will also be covered this semester. Treatment options involving genetic anomalies will be addressed in this course as well.

Credits: 3

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 640 - Clinical History and Physical Diagnosis with Lab I

This course teaches the foundational knowledge required to systematically obtain an accurate patient history and perform a comprehensive physical examination, setting the course for best-practice clinical approaches. The lecture component focuses on approaching and diagnosing diseases and disorders in relation to otolaryngology, ophthalmology, integumentary and musculoskeletal body systems. The lab component introduces the student to obtaining and performing a history and physical examination based upon patient complaint and presentation, as well as differential diagnosis. Proper use of diagnostic equipment and techniques for performing a physical examination will be learned.

Credits: 4

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 642 - Clinical History and Physical Diagnosis with Lab II

This course builds on the skills learned in Clinical History and Physical Diagnosis I, with a continued emphasis on relevant history-taking and physical examination techniques essential for effectively approaching and diagnosing diseases and disorders. The lecture component focuses on diagnosing conditions related to the neurologic, endocrine, gastrointestinal, genitourinary, and reproductive systems. The lab component involves practicing history-taking and physical examinations based on patient complaints and presentations, along with formulating differential diagnoses. Students will also learn to document using problem-oriented SOAP (Subjective, Objective, Assessment, Plan) notes, as well as pre- and postoperative encounters, hospital orders, consultations, progress notes, and discharge summaries. Emphasis will also be placed on the proper use of diagnostic equipment and physical examination techniques. Additionally, students will complete Basic Life Support (BLS) training to obtain or renew their cardiopulmonary resuscitation (CPR) certification.

Credits: 4

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 644 - Clinical History and Physical Diagnosis with Lab III

This course builds on skills learned in Clinical History and Physical Diagnosis I and II, continuing to focus on relevant history and physical examination skills needed to pragmatically approach and diagnose diseases and disorders. The lecture component focuses on approaching and diagnosing diseases and disorders in relation to the hematological, cardiovascular and pulmonary body systems. The lab component includes the continuation of obtaining and performing a history and physical examination based upon patient complaint and presentation, as well as differential diagnosis. Students will learn components of a well-person geriatric history and physical examination and well-child pediatric history and physical examination. Other topics covered in this course include challenges associated with diversity, and handling the difficult patient, preceptor, coworker, or supervisor. Students are required to become Advanced Cardiovascular Life Support (ACLS) certified or recertified in anticipation of clerkships.

Credits: 4

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 646 - Evidence Based Practice

This course will cover the fundamentals of evidence-based practice and its application to patient care. Major topics covered will include: Framing of a research question, basic biostatistics, design of medical and health studies, description of data, data analysis used in health-related journals, and the ethics of medicine, research, and the handling of data. Prerequisites: Successfully passed all first-semester courses meeting minimum progression standards.

Credits: 1.5

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 651 - Clinical Medicine with Lab I

This course teaches the pathology of disease by body system and specialty. Fundamental elements of clinical medicine such as epidemiology, precipitating factors, etiology, risk factors, pathogenesis, pathophysiology, clinical presentation and manifestations, red flags, diagnostics, clinical intervention, management of diseases and disorders, clinical pearls, and differential diagnoses as appropriately indicated are covered. Students will learn how primary and differential diagnoses are used to order laboratory tests, imaging and other diagnostic studies such as pathology reports in order to rule in or rule out disease processes and disorders. Blood-borne pathogen competency acquisition is also covered and students will also learn how to calculate needed values from given values when necessary. This course also involves the interactive practical application of acquired knowledge and is designed to develop critical thinkers, solidify medical concepts through collaborative learning experiences, and to appropriately interpret the results of the laboratory testing and to know what to do with the findings. Correlated reviews of relevant pathology and radiology are also incorporated. This course specifically focuses on disorders in relation to otolaryngology, ophthalmology, integumentary and musculoskeletal body systems.

Credits: 5

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 654 - Special Populations I

The course is intended to help students learn about and become comfortable with the special populations they will encounter as a medical care provider. This course will include populations affected by socioeconomic disparities in health care, the incarcerated population, and issues surrounding immigrants and refugees.

Credits: 1

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 661 - Clinical Medicine with Lab II

This course provides an in-depth study of disease pathology by body system and specialty. Key aspects of clinical medicine—such as epidemiology, precipitating factors, etiology, risk factors, pathogenesis, pathophysiology, clinical presentation and manifestations, diagnostics, clinical intervention, disease management, clinical pearls, and differential diagnoses—are comprehensively covered. Students will learn how to use differential diagnoses to guide the ordering of laboratory tests, imaging studies, and other diagnostic tools, such as pathology reports, to confirm or rule out disease processes. The laboratory component emphasizes the interactive and practical application of acquired knowledge, fostering critical thinking and solidifying medical concepts through collaborative learning experiences. Additionally, it prepares students to appropriately interpret laboratory and diagnostic results and take appropriate clinical action based on the findings. Correlated reviews of relevant pathology and radiology are integrated into the curriculum. The course specifically focuses on the endocrine, gastrointestinal, obstetrics/gynecology, genitourinary and renal components.

Credits: 5

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 664 - Special Populations II

The purpose of this course is for students to continue to learn about and become comfortable with the special populations they will encounter as a medical care provider. This course will cover persons with genetic and/or developmental disabilities, members of the minority sexual and gender identities community, and victims of abuse.

Credits: 1

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 671 - Clinical Medicine with Lab III

This course teaches the pathology of disease by body system and specialty. Fundamental elements of clinical medicine such as epidemiology, precipitating factors, etiology, risk factors, pathogenesis, pathophysiology, clinical presentation and manifestations, red flags, diagnostics, clinical intervention, management of diseases and disorders, clinical pearls, and differential diagnoses as appropriately indicated are covered. Students will learn how primary and differential diagnoses are used to order laboratory tests, imaging and other diagnostic studies such as pathology reports in order to rule in or rule out disease processes and disorders. Students will learn how to calculate needed values from given values when necessary. This course also involves the interactive practical application of acquired knowledge and is designed to develop critical thinkers solidify medical concepts through collaborative learning experiences and to appropriately interpret the results of the laboratory testing and to know what to do with the findings. Correlated reviews of relevant pathology and radiology are also incorporated. This course specifically focuses on hematology, cardiovascular and pulmonary body systems in addition to infectious disease and genetic anomalies.

Credits: 5

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 674 - Special Populations III

The purpose of this course is for students to continue to learn about and become comfortable with the special populations they will encounter as a medical care provider. Specifically, this course will cover individuals of the homeless population, individuals belonging to the HIV population, and veterans of the armed forces.

Credits: 1

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 677 - Clinical Exposure and Transition

This course incorporates experiential learning to prepare students for clerkships and clinical practice through facilitation and transition of medical application and skills from the academic phase of the curriculum to the clinical phase. Students are provided the opportunity to foster and refine communication skills, interprofessional responsibilities, and appropriate patient care strategies. Students will be placed in various clinical exposures throughout the semester to learn and evaluate professional behavior and patient care transition. Additionally, students will participate in a series of traditional classroom-based instruction that promotes active learning of clinical year preparation and expectations of the physician assistant student role and performance. Successfully passed all courses in the first and second semesters of Didactic year, and be in good standing in the Physician Assistant program.

Credits: 1

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 690 - Experimental

A unique and specifically focused course within the general purview of a department which intends to offer it on a "one time only" basis and not as a permanent part of the department's curriculum.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 695 - Workshop

A workshop is a program which is usually of short duration, narrow in scope, often non-traditional in content and format, and on a timely topic.

Credits: 1-6

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 698 - Selected Topics

A Selected Topics course is a normal, departmental offering which is directly related to the discipline, but because of its specialized nature, may not be able to be offered on a yearly basis by the department.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 700 - Independent Study

Independent Study courses give students the opportunity to pursue research and/or studies that are not part of the university's traditional course offerings. Students work one on one or in small groups with faculty guidance and are typically required to submit a final paper or project as determined by the supervising professor.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 701 - From Theory to Practice I

This course is designed to transition students from their academic experiences to clinical experiences to clinical practice. Topics will include issues students will encounter during clerkships, including patient safety principles, clinical setting communications, Occupational Safety and Health Administration (OSHA), Health Insurance Portability and Accountability Act (HIPAA), professionalism, quality improvement, prevention of medical errors, risk management and an in-depth discussion of program and professional requirements for progressing through the clinical year. Delivery of healthcare influences will be explored in how it relates to the practicing Physician Assistant. Healthcare legislation and policies will be examined for their impact on the national and local delivery of healthcare. Students will also review electronic medical records, billing, and coding that will be correlated with their clinical clerkship experience.

Credits: 1

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 702 - From Theory to Practice II

This course will focus on current Physician Assistant licensing and credentialing, health care law, and medical malpractice. Students will focus on requirements for state licensure, NCCPA certification, DEA licensing and hospital credentialing procedures. Medical malpractice insurance, risk management, regulations of Physician Assistants and PA Scope of practice will be covered. Students will review CME requirements for State licensure and National Certification. This course will largely focus on medical malpractice and Physician Assistant credentialing in relation to the Commonwealth of Pennsylvania. Opportunities will be provided for students to research credentialing laws/requirement in other localities well.

Credits: 2

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 703 - From Theory to Practice III

This course will focus on preparing MSPAS students to take the Physician Assistant National Certification Examination (PANCE). Preparation for PANCE will be covered to include review topics, test taking skills and scheduling the PANCE. This course will include the accreditation required Summative Examination and Summative OSCE. Students will focus on the transition of a Physician Assistant student to the new graduate Physician Assistant in clinical practice. Students will also learn tips on resume and CV writing as well as job interviewing skills. Students will be required to pass a Summative Written Examination and OSCE to pass the course.

Credits: 2

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PAS program.

Enrollment is limited to Graduate level students.

PHYA 771 - Clinical Clerkships Experience I

The first in a series of four clinical clerkship experiences, starting in the summer semester for 13-weeks in duration, this course is designed to allow students to develop the knowledge, skills, abilities and attitudes required to care for patients of all age groups. Students will be assigned to a minimum of two clinical rotation sites for 4.5-weeks in length, with a mandatory one-day call back session. The rotations can occur in any of the following disciplines: family medicine, general surgery, internal medicine, pediatrics, women's health, emergency medicine, behavioral health or any elective discipline. During Clinical Clerkships Experience I students will also complete a 3-week Special Populations rotation.

Credits: 12.6

Term(s) Typically Offered: Offered Summer Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 772 - Clinical Clerkships Experience II

The second in a series of four clinical clerkship experiences, during fall semester for 15-weeks in duration. Students will be assigned to a minimum of three clinical rotation sites for 4.5-weeks in length, in any of the following disciplines: family medicine, general surgery, internal medicine, pediatrics, women's health, emergency medicine, behavioral health or any elective discipline. At the conclusion of each 4.5-week rotation students will return to campus for a one-day call back session.

Credits: 14.4

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 773 - Clinical Clerkship Experience III

The third in a series of four clinical clerkship experiences, offered during the winter semester. This rotation is 3-weeks in length and is a special populations rotation which can encompass a variety of clinical specialties with a focus on patients within special populations.

Credits: 3

Term(s) Typically Offered: Offered Fall Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 774 - Clinical Clerkships Experience IV

The fourth in a series of four clinical clerkship experiences, offered during spring semester for 15-weeks in duration. Students will be assigned to a minimum of three clinical rotation sites for 4.5-weeks in length, in any of the following disciplines: family medicine, general surgery, internal medicine, pediatrics, women's health, emergency medicine, behavioral health or any elective discipline. Upon completion of each 4.5-week rotation students will return to campus for a one-day call back session.

Credits: 14.4

Term(s) Typically Offered: Offered Spring Terms

Enrollment limited to students in the MS 9PA3 or MS 9PAS programs.

Enrollment is limited to Graduate level students.

PHYA 776 - Clerkship General Rotation

A 4.5 week clinical rotation with a mandatory one-day call back session. The rotation can be in any of the following disciplines; family medicine, general surgery, internal medicine, pediatrics, women's health, emergency medicine, behavioral health or any elective discipline. MSPAS majors only. Satisfactory completion of all Didactic year Curriculum of MSPAS program.

Credits: 4.5

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to students with a program in Physician Assistant Studies.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Health Professions college.

PHYA 777 - Clerkship Special Population Rotation

A 3-week clinical rotation caring for patients in special populations, which can encompass a variety of clinical specialties with a focus on patients within special populations. MSPAS majors only. Satisfactory completion of all Didactic year Curriculum of MSPAS program.

Credits: 3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to students with a program in Physician Assistant Studies.

Enrollment is limited to Graduate level students.

Enrollment limited to students in the College of Health Professions college.

PHYA 790 - Experimental

A unique and specifically focused course within the general purview of a department which intends to offer it on a "one time only" basis and not as a permanent part of the department's curriculum.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 795 - Workshop

A workshop is a program which is usually of short duration, narrow in scope, often non-traditional in content and format, and on a timely topic.

Credits: 1-6

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.

PHYA 798 - Selected Topics

A Selected Topics course is a normal, departmental offering which is directly related to the discipline, but because of its specialized nature, may not be able to be offered on a yearly basis by the department.

Credits: 1-3

Term(s) Typically Offered: Offered as Needed

Enrollment is limited to Graduate level students.
