

HOMELAND SECURITY, BACHELOR OF SCIENCE (BS)/ ADVANCED PILOTING (CCBC)

Program Learning Outcomes (SRU)

- **Critical Thinking and Problem Solving in Homeland Security:** Students will be able to identify complex homeland security issues; gather, analyze, and evaluate pertinent information; in order to make decisions to prevent, mitigate, resolve, and recover from man-made, technological, and natural disasters. UO 2
- **Professional Proficiency in Homeland Security:** Students will acquire the knowledge, skills, abilities, and current field-based best practices demanded by the homeland security profession. UO 5
- **Law and Ethics in Homeland Security:** Students will be able to recognize legal and ethical issues confronting homeland security professionals, apply and follow the appropriate laws, and recognize the consequences and impact of their actions on other stakeholders. UO 8
- **Professionally Communicate in Homeland Security**
Contexts: Students will develop the skills and knowledge to communicate effectively in homeland security settings. This will, among other relevant things, involve learning how to communicate about how to protect infrastructure and key assets and develop intelligence products. This also entails the development and implementation of plans, particularly ones related to preventing, mitigating, and/or recovering from man-made, technological, and natural disasters. UO 5

Program Learning Outcomes (CCBC)

This program trains students in the subject content the Federal Aviation Administration (FAA) determined is necessary for commercial pilots; and takes students from first flight through multi-engine and Certified Flight Instructor ratings.
