INTERDISCIPLINARY PROGRAMS, BACHELOR OF SCIENCE (BS) - CONCENTRATION IN ANTHROPOLOGY

WHAT CAN I DO WITH AN ANTHROPOLOGY DEGREE?

Learn about the world and yourself. Anthropology is a broad field that seeks to understand what it means to be human in all possible ways, from understanding our evolutionary origins to examining our cultural variability. Students can follow their curiosity and study human behavior in the past or present and gain skills in linguistics, cultural studies, critical thinking, writing and analysis that are applicable to careers in academia; the corporate and business world; government; education; historic preservation and archaeology; museums; advocacy; design; market research; international development; and health care.

PROGRAM LEARNING OUTCOMES

LO 1 – Knowledge (UO 3 & 4)

Students will be able to identify, explain, and apply major social science theories, concepts, foundations, and methodologies to analyze social institutions, processes, and values that shape social life and social relations

LO 2- Critical Thinking (UO 2)

Students will be able to analyze and critically evaluate explanations of human behavior, social phenomena, and social processes informed by social science theories, empirical evidence, and arguments to construct well-reasoned explanations and evidence-based conclusions about social issues and social structures.

LO 3 – Community Inclusion (UO 9)

Students will be able to analyze and evaluate how systems of power, privilege, and inequality shape social experiences and outcomes across diverse populations, and apply social science concepts and evidence to propose informed responses or solutions

LO 4 – Effective communication (UO 1)

Students will be able to present and defend evidence-based arguments by integrating scholarly sources, appropriate methodologies, and disciplinary conventions from the social sciences in written and oral formats

LO 5 – Civic Engagement (UO 7)

Students will be able to demonstrate informed, ethical, and reciprocal civic engagement by applying social science knowledge and skills to community or public issues and reflecting on the impacts of their participation on themselves and the communities involved.
